# Creating a System for the Online Delivery of Oral History Content

Chris Petersen  
Special Collections and Archives Research Center  
Oregon State University Libraries

Online Northwest  
March 31, 2017

# Talk Objectives

Overview of the OH 150 Project

Description of its Technical Workflow

Examination of its Project Portal, including discussion of METS/MODS, TEI and XSL

Discussion of Digital Preservation Activities in support of the project

Assessment of the Portal Workflow

# OH 150: Project Overview

Conducted from 2013-2017 in anticipation of OSU's 150th birthday (2018)

The largest oral history project ever conducted at OSU

Interviews with three OSU Presidents and other well-known OSU figures

Broad regional representation, especially through interviews with Extension and Experiment Station staff

Formal launch scheduled for November 2017

# OH 150: Project Overview

~400 hours of content

270 total interviews (201 interview sets)

108 Alumni interview sets - nine decades represented

102 Faculty interview sets - each of OSU's colleges represented

22 Staff interview sets

10 Current Student interview sets

3.2 Million words transcribed

1.7 TB born digital

# OH 150 Project Details

Topical strengths including:

Athletics

International Studies

Military Service

Multicultural Communities

Public Service

The Advancement of Women

# Technical Workflow

Interviews captured using both video and audio recorders

Video the primary format (.mts raw files)

Audio the backup format (.wav raw files)

# Technical Workflow

Interviews processed using Adobe Premiere

Raw .mts files stitched together in Premiere

.mp3 audio derivative created as a transcription/access file

Stored on department file server for staff access

.mpg video derivative created as a low-resolution reference file

Stored on library preservation server

.m2t video derivative created as high-quality presentation file

Deleted following upload to public space

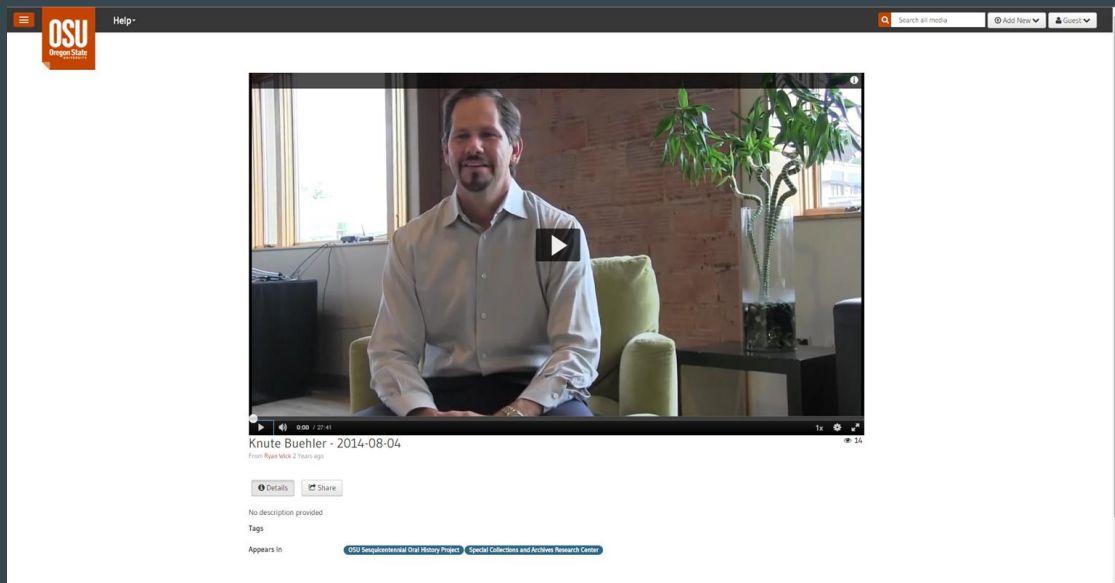

# Technical Workflow

.m2t presentation derivatives uploaded to OSU MediaSpace (Kaltura instance)

Made immediately available as raw interview video; minimal metadata

# Technical Workflow

Interview described in a dedicated archival finding aid

## Oregon State University Sesquicentennial Oral History Collection, 2013-2017

The Oregon State University Sesquicentennial Oral History Collection documents the history, culture and ambition of Oregon State University through interviews with alumni, faculty, staff, administrators, current students and supporters. Most of the items held in the collection take the form of life history interviews, their sole common thread being an association, past or present, with Oregon State University.

### CREATORS

ID: OH 026

EXTENT: 1740.0 gigabytes

### MORE EXTENT INFORMATION

### SCOPE AND CONTENT NOTES

### BIOGRAPHICAL / HISTORICAL NOTES

STATEMENT ON ACCESS: Collection is open for research.

### ARRANGEMENT

PREFERRED CITATION: Oregon State University Sesquicentennial Oral History Collection (OH 026), Oregon State University Special Collections and Archives Research Center, Corvallis, Oregon.

ACQUISITION NOTE: All interviews were conducted by Oregon State University Sesquicentennial Oral History project staff, sometimes in concert with other colleagues as indicated.

ACQUIRED: Future additions to this collection are anticipated.

# The OH 150 Portal: Background

## Primary Ambitions:

- Present full video with transcripts and contextual information in a visually appealing package

- Make content browseable, searchable and sortable

## Secondary Ambitions:

- Provide PDF view/download option for transcripts

- Enable download of .mp3 audio for all interviews

# The OH 150 Portal: Recycled Code!

## Index Pages: SCARC Events (mid-2000s)

### Events

#### "SCIENTISTS MAKING WAVES AND BRINGING HOPE," DR. JANE LUBCHENCO

##### 2016 Linus Pauling Legacy Award

April 26, 2016  
Oregon State University professor and U.S. Science Envoy for the Ocean Dr. Jane Lubchenco spoke in Portland, Oregon on Tuesday, April 26, 2016. Her lecture, titled "Scientists Making Waves and Bringing Hope," was presented at the Oregon Historical Society Museum. Lubchenco was honored as the ninth recipient of the Linus Pauling Legacy Award, granted once every two years for outstanding achievement in an area of study once of interest to Dr. Linus Pauling. The Pauling Legacy Award is sponsored by Oregon State University Libraries and Press.

#### "TAP INTO HISTORY": FOUR PERSPECTIVES ON BREWING IN OREGON"

##### Panel Discussion

March 28, 2014

This event took place at the Oregon Hops & Brewing Archives launch party and was accompanied by screenings of video shorts and a full-length documentary on the history of brewing. Panel participants included agriculture historian Peter Kopp, journalist John Foytson, Full Sail Brewing founder and CEO Irene Firmat, and OSU doctoral candidate Daniel Sharp.

#### "PIONEERS OF CHANGE: BLACK FOOTBALL PLAYERS AT OSU FROM 1951-PRESENT"

##### Panel Discussion

February 18, 2014

This event paid posthumous tribute to the first African American football player at OSU, Dave Mann (1951-1954), and also discussed the desegregation of football and what that has meant for the Oregon State athletic program. Panelists included past OSU football players Earnel Durden (1956-1958) and Ken Simonton (1998-2001), football historian Dr. Michael Onard, author Herman Brame, and sociologist Dr. Dwaine Plaza. The event was sponsored by Oregon Humanities.

## OH 150 (2014)

#### KNUTE BUEHLER ORAL HISTORY INTERVIEWS

##### Two life history interviews conducted by Janice Dilg.

August 2014 - August 2015

Knute Buehler (b. 1964), a native of Roseburg, Oregon, attended Oregon State University from 1982 to 1986, where he played on the baseball team and graduated with a B.S. in Microbiology. Following the completion of his studies at OSU, Buehler was selected as a Rhodes Scholar, the first in OSU history. He completed his Oxford M.A. in Politics and Economics and went on to earn an M.D. from Johns Hopkins University. Buehler now practices as an orthopedic surgeon in Bend, Oregon, and is active in both statewide and national politics. Over two interviews, Buehler discusses on his life at OSU, his experiences at Oxford, his medical training and career, and his interest in politics.

[Main Page](#) | [Video](#) | [Abstracts](#) | [Biography](#)

#### KARYLE BUTCHER ORAL HISTORY INTERVIEW

##### Life history interview conducted by Janice Dilg.

May 8, 2014

Karyle Butcher (b. 1942) was a member of the OSU Libraries faculty from 1981 to her retirement in 2010, serving as University Librarian for the final fourteen years of her career. As director of the OSU Libraries, Butcher oversaw a massive physical expansion of the campus' main branch library, promoted a culture of scholarship and innovation within the organization, and guided OSU Libraries to a position of leadership within an information landscape rapidly transitioning from paper to electronic. During Butcher's tenure as University Librarian, the University Archives and the OSU Press - with Butcher serving as director - also came under the umbrella of the OSU Libraries. Her interview traces her personal evolution as a librarian and as a leader, and also documents the massive changes that came about during her years of association with the OSU Libraries.

[Main Page](#) | [Video](#) | [Abstract](#) | [Biography](#)

#### JOHN BYRNE ORAL HISTORY INTERVIEWS

##### Four life history interviews conducted by Chris Petersen.

January - February 2014

John Byrne (b. 1928) has made an indelible impact on Oregon State University through an association that has spanned over five decades. A trained geologist, Byrne arrived in Corvallis in 1960 as one of Oregon State College's first faculty members in Oceanography. Over time, Byrne assumed chairmanship of the Oceanography Department and later became Dean of OSU's newly formed School of Oceanography. In 1976 Byrne moved into upper administration, first as Dean of Research and later as Vice President for Research and Graduate Studies. Following a three-year stint in Washington, D.C., where he served as head of the National Oceanic and Atmospheric Administration, Byrne returned to Corvallis as the twelfth President in OSU history. Byrne's presidency lasted from 1994-1995, a time period during which he did much to modernize university operations amidst a budget crisis caused by significant reductions in state funding for higher education. The Byrne oral history interviews trace the arc of his entire life, from his childhood on Long Island to his graduate studies at USC, and on to his tenures at Oregon State and with NOAA.

#### DARRY CALLAHAN ORAL HISTORY INTERVIEW

##### Life history interview conducted by Mike Dicianna.

August 6, 2015

Darry Callahan (b. 1942) graduated from OSU in 1964 with a degree in Chemical Engineering and moved directly into a career at Chevron that spanned some forty years. Over the course of that time, Callahan worked as a research engineer, financial analyst, manager and executive. At one time the president of Chevron Oil Bahamas, Callahan also served as the chief executive at Chevron Chemical Company as well as the succeeding company that he helped to merge, Chevron Phillips Chemical. Callahan has also been very actively involved with the OSU Foundation, the OSU College of Engineering, and the OSU Board of Trustees, of which he has been a member and vice chairman since its creation. His interview focuses on his undergraduate years in Corvallis, his long and varied career at Chevron, and his more recent activities with his alma mater.

## Guide to the Ralph I. Gifford Photographs, circa 1910s - 1947

### Title

Ralph I. Gifford Photographs (P 218-SG 2)

### Dates

circa 1910s - 1947 (inclusive)  
1935-1947 (bulk)

### Creator

Gifford, Ralph I.

### Summary

The Ralph I. Gifford Photographs consist of images taken by Gifford throughout Oregon, primarily during the 1930s and 1940s. The photographs depict many Oregon landmarks and scenes, including the Oregon Coast, Crater Lake, Mount Hood, the Willamette Mountains, and the Snake River Canyon. The collection includes numerous images of sport fishing as well as several photographs of Native Americans. Ralph Gifford was the son of Benjamin A. Gifford and took over his father's Portland photography business around 1920. In 1936, Ralph became the first photographer of the newly established Travel and Information Department of the Oregon State Highway Department, a position he held until his death in 1947.

### Quantity

2.5 cubic feet, including 2089 photographs (17 boxes, including 2 oversize boxes, and 1 map folder)

### Restrictions on Access

Collection is open for research.

## Transcript

**Janice Dilg:** So, today is August 4th, 2014. I'm here with Dr. Knute Buehler at his campaign headquarters in Bend, Oregon. My name is Janice Dilg and this is part of the Oregon State University oral history project. Good afternoon.

**Knute Buehler:** Good afternoon.

**JD:** So, I think it seems always kind of fitting to begin a little at the beginning. If you would just talk briefly about where you're from and you're growing up, and perhaps what you were interested in and liked to do in your early years.

**KB:** Yeah, well I have deep, deep Oregon roots. I grew up in Roseburg, I graduated from Roseburg High, and then from there on to Oregon State, so I have that connection with the state, certainly. So, my decision to go to Oregon State certainly was easy based on that.

**JD:** And what was it about Oregon State University that attracted you? There are other universities within the borders.

**KB:** That's right. Well, I think it was that unique combination of a great location in Corvallis—I had a brother who went there, so I felt comfortable at Oregon State, spent quite a bit of time with him, which was really nice of him to show me around when I—because I'm eight years younger than him, so showing your little brother around college is not always the most, the first choice of a big brother, but he was good about that. And then I played baseball at Oregon State, so you know the top-rated baseball program certainly was an attraction, and then high quality academics in the subjects I was interested in, and that was mainly microbiology at that time.

**JD:** So, you had already developed some fairly specific interests, or just you knew microbiology broadly and would figure it out from there?

**KB:** Yeah, exactly. So, I knew I liked science, was interested in science, exactly which direction I didn't know, but I had an interest in microbiology from the very beginning, because of—then genetic engineering was just starting and that's really captivated me when I was a high school student.

**JD:** So, talk briefly about when you arrived in Corvallis on the OSU campus, kind of what was the campus like at that point in time and what were your interactions with some of the professors and the courses that you took?

**KB:** Well, I remember the first week I got there, because the baseball team actually shows up a couple of weeks before school starts, which is actually quite nice because no one else is around and you kind of have a free run of the place, which was nice to sort things out as a freshman. It also introduced you to upperclassmen on the baseball team who became good advisors and mentors of things to do and things not to do, classes to take and those types of things. And then we quickly transition from the baseball into the dorms, which is always a great experience, so I was on the fourth floor of McNary Hall, which I don't, not sure if McNary is still a dorm anymore, but—

**JD:** It's actually part of the Honors College.

## JULIE BENTZ ORAL HISTORY INTERVIEW

Life history interview conducted by Chris Petersen.

June 14, 2013

Julie Bentz (b. 1964) graduated from Oregon State University in 1986 with a Bachelor of Science degree in United States Army Major General. Bentz, at the time of this interview, served as the Director, Strategic National Security Staff within the Executive Office of the President. While attending OSU, she was in ROTC program. The Bentz oral history interview covers her educational, social, and military experience.

## CARL AND KIM CASALE ORAL HISTORY INTERVIEW

Life history interview conducted by Chris Petersen.

November 5, 2015

Carl Casale (b. 1961) and his wife Kim (Martin) Casale both graduated from OSU in 1983 with degrees in Business Administration. Carl Casale moved up the executive ranks at the Monsanto Corporation, ultimately rising to the position of Chief Executive Officer. Kim enjoyed career growth as well, eventually becoming an Area Director at Bristol-Myers Squibb. Carl accepted the position of Chief Executive Officer and President of CHS, Inc., the nation's largest agricultural company. Though based in Minnesota, the Casales also own and operate a 100-acre blueberry farm. They manage, in part, through cutting-edge precision agriculture technologies. Their wide-ranging international experiences, their career trajectories, Carl's life as a chief executive; their blueberry farm; and their co-

## SUSAN CASTILLO ORAL HISTORY INTERVIEW

Life history interview conducted by Janice Dilg.

June 17, 2014

Susan Castillo (b. 1951) graduated from OSU in 1981, having returned to school at the urging of OSU Pearl Spears Gray, for whom Castillo worked as a secretary. A Communications major, Castillo found her passion in journalism and worked for KVAL-TV Eugene, and her coverage of the Oregon legislature sparked her interest in running for office. In 2003-2012, she also served as Superintendent of Public Instruction in the Oregon Department of Education, representing students of color and low-income families, among many other initiatives. Her interview focuses on her career in journalism and politics.

# METS and MODS: Used at OSU for ~15 years

Metadata Encoding and Transmission Standard (METS): Used to encode descriptive, administrative and structural metadata for digital objects

XML schema

Metadata Object Description Schema (MODS): Bibliographic description schema for digital objects

Also an XML schema; analogous to a MARC record for digital objects

In our case, MODS description is nested within METS records

Text Encoding Initiative: A simple xml-based mark-up language used to encode texts

Used at OSU Libraries for many years to prepare texts for presentation on the web.

Also used by OSU Libraries to encode texts for print production.

Easy to learn and well-suited for student work.

<?xml version="1.0" encoding="utf-8"?>

## KNUTE BUEHLER ORAL HISTORY INTERVIEWS

Two life history interviews conducted by Janice Dilg.

August 2014 - August 2015

### Abstracts

"OSU's First Rhodes Scholar" August 4, 2014 Location: Buehler campaign quarters, Bend, Oregon. [Watch Video](#) | [Download Transcript \(PDF\)](#)

In interview 1, Buehler reflects upon his roots as an Oregonian and his undergraduate experience at Oregon State University. In particular, Buehler discusses his academic experience - including two influential professors - his participation on the OSU baseball team, his hangouts, and campus jobs that he held. From there he notes his time at Johns Hopkins University School

Project

"From Baltimore to Oxford" August 5, 2015 Location: The Center: Orthopedic and Neurosurgical Care and Research, Bend, Oregon. [Watch Video](#) | [Download Transcript \(PDF\)](#)

In his second interview, Buehler provides additional details on his experiences in medical school, as a Rhodes Scholar at Oxford, and as a legislator in the Oregon House.

He begins by describing the value that an OSU degree has brought to his life, and then moves on to a description of his medical training at Johns Hopkins University. In this, Buehler touches upon the poverty and social problems that gripped Baltimore during his time there and the impact that they made upon him as a doctor-in-training. He also discusses his contributions to various community outreach efforts during his tenure at Johns Hopkins, as well as his participation on the medical school's governing council.

The bulk of the session is devoted to Buehler's stint as a Rhodes Scholar at Oxford University. He describes the application process required of potential Rhodes Scholars, including the multiple interviews that he incurred along the way. He also details the significant differences between Oxford's approach to education as compared to his earlier experiences at OSU, and reflects on the far more formal social milieu at Oxford as well.

The interview concludes with Buehler's thoughts on successes that he was a part of during his first session in the Oregon House, his optimism for the development of OSU-Cascades, and his appreciation of OSU as it looks forward to its sesquicentennial.

### Transcript

Janice Dilg: So, today is August 4th, 2014. I'm here with Dr. Knute Buehler at his campaign headquarters in Bend, Oregon. My name is Janice Dilg and this is part of the Oregon State University oral history project. Good afternoon.

Knute Buehler: Good afternoon.

JD: So, I think it seems always kind of fitting to begin a little at the beginning. If you would just talk briefly about where you're from and you're growing up, and perhaps what you were interested in and liked to do in your early years.

Two life history interviews conducted  
August 2014 - August 2015

**Biography**

Knute Carl Buehler was born in 1964 in Roseburg, Oregon, attended high school in 1982. That year he began his B.S. in Microbiology and was a member of the baseball team and graduated with a B.S. in Microbiology in 1986. Buehler is the first Rhodes Scholar from 1988-1990, studying Political Science from Johns Hopkins University. Buehler now practices as an orthopedic surgeon and is also a past party nominee for Oregon's District 54 in the Oregon House of Representatives. Over two interviews, Buehler discusses on his professional, Buehler has interned in the Department of Orthopedics and Neurosurgical Care and Research, and has been actively involved in both state and national politics.

<p><hi rend="bold">Janice Dilg:</hi> So, today is August 4th, 2014. I'm here with Dr. Knute Buehler at his campaign headquarters in Bend, Oregon. My name is Janice Dilg and this is part of the Oregon State University oral history project. Good afternoon.</p>

<p><hi rend="bold">Knute Buehler:</hi> Good afternoon.</p>

<p><hi rend="bold">JD:</hi> So, I think it seems always kind of fitting to begin a little at the beginning. If you would just talk briefly about where you're from and you're growing up, and perhaps what you were interested in and liked to do in your early years.</p>

<p><hi rend="bold">KB:</hi> Yeah, well I have deep, deep Oregon roots. I grew up in Roseburg, I graduated from Roseburg High, and then from there on to Oregon State, so I have that connection with the state, certainly. So, my decision to go to Oregon State certainly was easy based on that.</p>

<p><hi rend="bold">JD:</hi> And what was it about Oregon State University that attracted you? There are other universities within the borders.</p>

20

<p><hi rend="bold">KB:</hi> That's right. Well, I think it was that unique combination of a great location in Corvallis—I had a brother who went there, so I felt comfortable at Oregon State, spent quite a bit of time with him, which was really nice of him to show me around when I—because I'm eight years younger than him, so showing your little brother around college is not always the most, the first choice of a big brother, but he was good about that. And then I played baseball at Oregon State, so you know the top-rated baseball program certainly was an attraction, and then high quality academics in the subjects I was interested in, and that was mainly microbiology at that time.</p>

<p><hi rend="bold">JD:</hi> So, you had already developed some fairly specific interests, or just you knew microbiology broadly and would figure it out from there?</p>

<p><hi rend="bold">KB:</hi> Yeah, exactly. So, I knew I liked science, was interested in science, exactly which direction I didn't know, but I had an interest in microbiology from the very beginning, because of—then genetic engineering was just starting and that's really captivated me when I was a high school student. </p>

<p><hi rend="bold">JD:</hi> So, talk briefly about when you arrived in Corvallis on the OSU campus, kind of what was the campus like at that point in time and what were your interactions with some of the professors and the courses that you took?</p>

<p><hi rend="bold">KB:</hi> Well, I remember the first week I got there, because the baseball team actually shows up a couple of weeks before school starts, which is actually quite nice because no one

# XSL Transformation/XSL Formatting Objects

Extensible Stylesheet Language (XSL): A family of languages used to transform and render XML documents

XSLT: In this case, a collection of rules that interprets METS and TEI records and, with the help of CSS, creates HTML as its output.

No HTML is ever encoded for any of our projects. All of our HTML is a product of XML, XSL, and CSS.

# XSL Transformation/XSL Formatting Objects

XSL-FO: The flavor of XSL used by us to create PDFs.

All PDFs are generated as a result of the batch command line process that we run to generate HTML as well. E.g. -- it all happens at once and all as a result of a single command line process.

XSL is extremely powerful but it requires specialized expertise. This requirement is the biggest hindrance to wider adoption of the OH 150 platform across institutions.

## DARRY CALLAHAN ORAL HISTORY INTERVIEW

Life history interview conducted by Mike Dicianna.

August 6, 2015

Darry Callahan (b. 1942) graduated from OSU in 1964 with a degree in Petroleum Engineering that spanned some forty years. Over the course of that time, Callahan was a manager and executive. At one time the president of Chevron Oil Baha Chemical Company as well as the succeeding company that he helped create. He was very actively involved with the OSU Foundation, the OSU College of Engineering. He has been a member and vice chairman since its creation. His interview focus

ORAL HISTORY PROJECT

HOME THE INTERVIEWS THE PROJECT

About the Project

The Oregon State University Sesquicentennial Oral History Project is the largest oral history initiative ever conducted at OSU. Sponsored by the OSU Office of the Provost, OSU Marketing and Relations, OSU Libraries and Press (OSULP), the OSU Alumni Office and The Oregon Stater alumni magazine, the project attempts to holistically document the history, impact and ambitions of the university through the recollections of various alumni, faculty, staff, administrators and current students affiliated with OSU. A multi-year initiative, the project is one of many to be sponsored in anticipation of the university's sesquicentennial celebration in 2018.

Upon transcription, all interviews are presented on this website and may be browsed through an **A-Z list** or explored by interviewee **affiliation** or **theme**. In addition, interview transcripts are presented alongside each video in downloadable PDF format and audio .mp3 files of every session are freely available for download **via this link**.

Upon transcription, all interviews are presented on this website and may be browsed through an **A-Z list** or explored by interviewee **affiliation** or **theme**. In addition, interview transcripts are presented alongside each video in downloadable PDF format and audio .mp3 files of every session are freely available for download **via this link**.

- Nearly 400 hours of total interview time and over 3.2 million words of transcription. (In excess of 1.7 terabytes worth of born digital captured as a result of the project.)
- More than 100 interviews with **OSU alumni**.
- Close to 100 more with OSU faculty, both **current** and **emeritus**.
- Another 20 interviews with OSU staff (**current** and **retired**) and 10 more with current OSU students (**undergraduate** and **graduate**).

In addition:

- OSU President **Ed Ray** gave four interviews for the project, as did President Emeritus **John Byrne**, President Emeritus **Paul R. Less** than four months before he passed away in July 2014.
- All of OSU's colleges are represented within the collection, including the Graduate School and the University Honors College campuses, the Hatfield Marine Science Center in Newport and OSU-Cascades in Bend. More than twenty interviews include Experiment Stations as a major theme. Other institutional areas of strength include the OSU Foundation, the Linus Pauling and Press, and OSU Ecampus.
- OSU's Land Grant heritage and mission are documented throughout the project. Specific interviews focusing on **Sea Grant**, **Space** at OSU are included as well.
- The collection features interviews with more than a dozen OSU Distinguished Professors, four members of the OSU Board of co-chairs of the \$1 billion Campaign for OSU, Pat Reser, Jim Rudi and Pat Stone.
- By the numbers, the collection's most significant topical strengths include the Advancement of Women, Athletics, Entrepreneur Sustainability, International Studies, Journalism, Military Service, Multiculturalism, Oceanography and Public Service.
- Within Oregon, project staff traveled to Bend, Hood River, Klamath Falls, Newport, Pendleton and Sutherlin, as well as many long Willamette Valley, to collect interviews. Outside of the state, interviews were conducted in Denver, Colorado; Houston, Texas; Los Norman, Oklahoma; Saratoga, California; and Washington, D.C.

# Preservation

Not great!

So far, following a poor man's LOCKSS (Lots of Copies Keep Stuff Safe) protocol

.mp3 derivative on department file share

.mpg derivative and raw files (.mts and .wav) on library preservation share

Department and preservation servers are two different RAID arrays physically located right next to each other...

# Preservation

Access video provided by OSU MediaSpace

Likely a third server located in the same room as the above two

All raw files as well as Word transcript files uploaded to Box

My personal account, so issues there

Print everything out? ...considering it...

Hopefully getting better!

Library testing Archivematica as a preservation solution for all of its digital content

# Assessing the OH 150 Platform

## Pro

Achieved all of our design objectives

Did so using mostly recycled code

A platform with which we are very experienced and quite comfortable, so efficient locally

Also used for a second smaller oral history project that is currently online

# Assessing the OH 150 Platform

## Con

Would be at least somewhat difficult to implement elsewhere

METS template is fairly easy to master

TEI encoding is trivial

XSL components are much trickier, though OSU's code could likely be tweaked by someone with rudimentary knowledge of XSL

Requires custom CSS & graphic design from project to project

Requires a media host

# The Future of Oral History at OSU

## In the process of implementing the Oral History Metadata Synchronizer

Web-based metadata editor developed at the  
University of Kentucky

Enables indexing as an alternative to full  
transcription

OHMS metadata objects exported out of  
OHMS editor and displayed within a  
CMS (Omeka, in our case)

Far less flexible or customizable than OH  
150, but much more extensible

The screenshot displays a video player interface for an oral history interview. At the top, the title "Urmila Mali Oral History Interview, November 14, 2014" is shown, along with the Oregon State University logo and a URL. The video player shows a woman, Urmila Mali, speaking. Below the video player, there is a transcript section with a search bar and a "Search" button. The transcript text includes the following dialogue:

JT: Our names are Jessica Tafoya and Emily Boyd. We are students in Oregon State University's U-Engage class, "Untold Stories, People of Color in Oregon." Today's date is November 14th 2014, and we are conducting an oral history interview with Urmila Mali.

EB: Please state your name and spell it out loud.

UM: So my name is Urmila Mali, it's U-R-M-I-L-A, and my last name is M-A-L-I.

JT: What is your birthdate and birthplace?

UM: My birthdate is November 3rd, 1969 and birthplace is Kathmandu, Nepal.

EB: With which ethnic or cultural backgrounds do you identify?

UM: So I am—depending on who I'm talking to, so I'll normally say Asian, but my ethnicity is Nepali and my background is Newari, which is my mother tongue as well.

JT: When and where were your parents born, and what are their backgrounds?

UM: So, my mom and dad both are Newari, they were both born in Kathmandu, Nepal. My dad was born in late '20s, and my mom was born in late '30s.

EB: Where did you grow up and where were you raised?

UM: So, I was born in Nepal, but I was raised in Tillamook, Oregon. So, I moved here in U.S. in 1979 and started school in Tillamook starting 4th grade and graduated from there.

JT: What was your transition from high school to college?

UM: For me the transition was, I was actually looking forward to coming to OSU

# Thank You!

<p><hi rend="bold">Chris Petersen:</hi> Any questions?</p>
